

ELASTICUT™

Description

Cad Cut® highly stretchable material conceived for extremely thin decoration (screen-printing effect). Specially developed for elastic textiles (Lycra®, Elastan®, etc.). It is an eco-friendly material. It's a 3 layer material: 1. A clear lightly adhesive backing; 2. A clear support layer 3. Coloured film with thermo film.

Basic Information

Due to the many different base materials available on the market, the following heat transfer instructions are given as guideline only:

Temperature: 160°C

Time: 15"

Pressure: medium

Application Instructions

- 1) We suggest to preheat the fabrics before application
- 2) Cut **in reverse** with enough pressure to cut the support layer (2) and the coloured film (3). Don't cut the backing (1)! We suggest to use a Flock blade
- 3) Weed exceeding material (support layer and coloured film)
- 4) Place Elasticut onto fabric with its own polyester backing
- 5) Heat apply for 15 sec. Wait 3-5 seconds and remove backing
Remove support layer and polyester backing at the same time. Please remove immediately possible residuals on the coloured film
- 6) In order to avoid deformation of the applied design, wait at least 24 hours after application before stretching the fabric

Suitable for

Specially developed for elastic textiles (Lycra®, Elastan®, etc.). it is as well suitable for normal textiles (cotton, polyester).

Not suitable for treated and dyed garments (sublimation inks)

Washing: (wait 24h after the heat transfer)

50°C Max. – do not use bleach or other aggressive chemical agents

Dry-cleaning : no

Tumble drier : yes

N.B. : all information given in this sheet are based on our experience

We recommend to always perform a test before starting standard production

The product meets the Italian and Ue regulations relating to its proper use.
